

Eldfell in Safir 9 cp.

# ELDFELL

## Comforting warmth in the harshest conditions

Get rid of damp and cold, create a warm, cosy atmosphere, dry clothes, cook food – enjoy your home comforts. With its ingenious design, efficient heat transmission and easy handling, Eldfell is the heart of the Nordic tipi and a faithful friend in cold and damp conditions. Eldfell is designed so that combustion takes place near the ground, creating more heat inside the Nordic tipi, providing more effective heat for cooking and reducing wood consumption. Eldfell fits all Adventure tents from size 5 and larger, using the same stove body but different chimney lengths.

# Key features

**1**

**Large combustion chamber**  
Spacious and about 50 cm long to take long, thick logs. All stove parts fit in the combustion chamber when the stove is packed down.

**2**

**Chimney**  
With adapted diameter to achieve an efficient combustion as low in the stove as possible.

**3**

**Folding legs**  
Reduces pack size and ensures the stove to stand stable and above the ground. In order not to sink down in snow, the legs have notches so they can be placed on poles.

**4**

**Air vent damper**  
Regulates the air intake in the stove for efficient combustion and heating.

**5**

**Insulation pipe**  
The extendable insulation pipe protects the tent fabric even in strong winds or if the snow under the stove sinks down.

**6**

**Spark arrester**  
Prevents sparks from leaving the chimney to protect both the tent fabric and the surroundings.

**7**

**Wooden box**  
Durable and protective, specially developed for Eldfell to minimize packing volume. Can be used as a table in the tent.

**8**

**Chimney extensions**  
Eldfell fits tent sizes 7, 9 and 15 using different numbers of chimney extensions. The basic stove kit fits a tent size 5.
